Within 5 trading days	54.0%
Within 15 trading days	74.0%
Within 30 calendar days	86.0%
Within 90 calendar days	96.0%
More than 90 days	100.0%

ENDNOTES

- The \$9.84B figure on page 1 is firm AUM across all managed accounts. The flagship fund AUM is \$5.36B and is the appropriate fund-level capital measure for this report.
- Benchmark returns are included for context only and do not represent the fund. Gross performance does not reflect fees and expenses; the requested monthly and YTD values are net.
- Sector and region rankings should be based on NET exposure, not gross exposure. A larger gross value does not necessarily make a sector the top net exposure.
- Liquidity percentages on this page use the total-fund denominator and are cumulative. The 30-day field therefore maps directly to the row labeled Within 30 calendar days.
