DESIGNATED REPORTING VEHICLE FOR THIS EXERCISE: BLUE FERN GLOBAL STRATEGIES FUND II LTD.

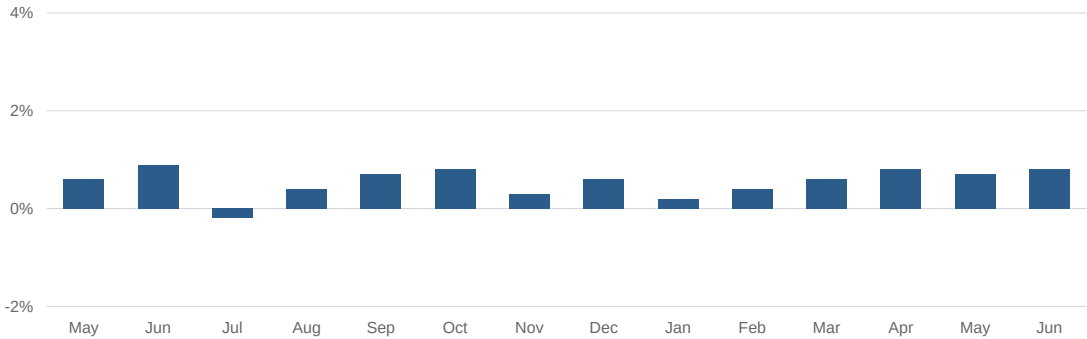

Except where otherwise noted, some sections contain strategy-level information shared across aligned vehicles. Vehicle-specific performance and capital values are identified by fund name. The preparation timestamp is not the reporting date.

CONFIDENTIAL - SYNTHETIC RECRUITING MATERIAL

Prepared for recruiting review: 2026-07-22 09:40:18 -04:00

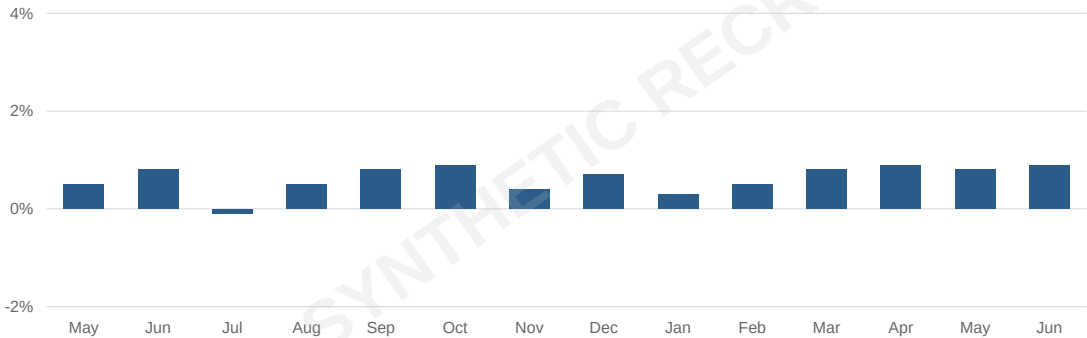

This report is fictional and was created for a technical hiring exercise. No real manager, investor, portfolio, or financial value is represented. It intentionally contains multiple fund names, multiple dates, and scope-specific tables so an extraction workflow must preserve context and identify uncertainty.

Methodology note

Separate total long and total short figures are not reported in this condensed risk extract. Gross and net market exposure are calculated using strategy-specific conventions, including netting and derivative-equivalent exposure. Do not infer or algebraically decompose total long and short values from the two aggregate figures. Sector and liquidity tables above are explicitly limited to the public-equities sleeve.
